A WORD FROM THE PRESIDENT ...

No greater harm can be done to our young bowlers then to let them think or feel that because he or she belongs to the USBC then, *That's It*. In other words, USBC is NOT the only bowling association to belong to.

Veteran bowlers, 60 years ago, stood at the back door of white owned bowling centers until after midnight to enjoy the sport of bowling. This was one of the primary reasons The National Bowling Association was formed, so that bowlers of color could receive the same acknowledgements as white bowlers with ABC and WIBC.

Billy Holiday, a great Jazz Legend, had a song "God Bless the Child" which included the phrase; "God Bless the Child that's got his own". These words should reinforce our commitment to TNBA. We should encourage our young bowlers to join TNBA through the Chicago Bowling Senate. This organization can only survive with new members coming into and joining the ranks, to learn the inner workings at the Senate level working their way up the ladder to the Regional and then National. We have future TNBA Presidents and Tournament Directors in our midst. Let's not allow the sacrifices of those bowlers before us go in vain. Honor them by supporting your local Senate!

**Clarence Dixon, President
Chicago Bowling Senate**

A BOWLER'S VIEW

GOTTA SMOKE?

"I'm on nine in a row and I can't have a cigarette!!!"

That is not the exact quote but it's the best I'm going to do for a newsletter. You can use your imagination for the real quote but I'm going to set a good example for kids. This year brings Illinois a new no smoking law that's sure to get mixed reactions from Illinois bowlers.

Public Act 095-0017 is the Smoke Free Illinois Act. The law made Illinois the 22nd state to ban smoking in most indoor spaces and overrides 46 local antismoking ordinances already on the books in Illinois. Right now it is the most restrictive law of any in the United States. The law sets fines for noncompliance for both smokers and property owners, and bans smoking within 15 feet of building entrances as well as indoors.

When I talk to smokers most of them feel that in adult venues the government has overstepped its boundaries by saying it is okay to drink but it is not okay to smoke. They feel the government has invaded their privacy. Yet, more and more states are adopting laws that prohibit smoking in public and smokers everywhere are calling "foul". The dilemma is we need these types of laws because we know, scientifically, that second-hand smoke kills.

A 2006 report by the U.S. Surgeon General, showed that exposure to secondhand smoke kills at least 65,000 people (who don't smoke) a year in the United States. Inhaling secondhand smoke causes lung cancer and coronary heart disease in healthy nonsmoking adults and

increases the risk of serious respiratory problems like asthma attacks in children. The report goes on to say that separating smokers from non-smokers within the same enclosed environment does not protect non-smokers. Ventilation systems and air cleaners are also not effective at eliminating secondhand smoke therefore they offer no protection to non-smokers either. The only effective means of protecting people from secondhand smoke is to eliminate smoking indoors, hence the new Illinois law.

I feel bad, as a non-smoker, as I watch my fellow bowlers who are used to bowling and smoking or smoking and drinking make adjustments to just bowling and drinking until the 10th frame when they have time to go outside to "enjoy" a cigarette. Anyone who makes that trip fifteen feet from the door when it is cold and snowing or raining outside, truly needs their nicotine fix. I'm sorry I can't relate to you but I know every time you make that trip you want to tell some lawmaker to kiss your ash.

At the same time, I have to admit that I love being able to come home from bowling and not leave my clothes and coats in the garage or outside to air out. I enjoy not having to wash my hair before I go to bed after a night out playing cards and singing karaoke after league is finished. It's a wonderful thing to breathe air that I know is not going to increase my chance of getting lung cancer.
